

Gerardo Verdad

Senior QA Test Automation Engineer

Crowley, Texas ■ verdad.gerardo@gmail.com ■ (956) 320-6410

PROFILE

Senior QA Test Automation Engineer with 8+ years of experience architecting, scaling, and modernizing automation frameworks for web and API platforms. Specialized in Playwright + TypeScript automation enhanced with AI-driven testing strategies, including Playwright MCP agents to intelligently generate, execute, and optimize test coverage. Proven ability to scale test effectiveness, reduce maintenance overhead, and improve release confidence through CI/CD integration, accessibility automation, and data-driven validation. Trusted technical leader passionate about innovation, quality engineering, and continuous improvement.

TECHNICAL SKILLS

- **Programming Languages:** TypeScript, JavaScript (ES6), Python, Node.js, Ruby
- **Test Automation:** Playwright, Selenium WebDriver, WebdriverIO, Puppeteer
- **Test Architecture & Strategy:** Automation framework design, scalable test architecture, test data management, shift-left testing, CI/CD quality gates
- **Advanced & AI-Driven Automation:** Playwright MCP Agents for AI-assisted test generation and execution; intelligent scenario discovery and test coverage expansion; AI-assisted automation maintenance and test optimization
- **Mobile Testing:** Cross-device browser testing, responsive UI validation across iOS and Android devices
- **CI/CD Tools:** GitHub Actions, Jenkins, Azure Pipelines, Docker, Docker Compose
- **Cloud Platforms:** Microsoft Azure, AWS (Lambda, S3, DynamoDB, API Gateway)
- **Databases:** SQL Server, Azure SQL, DynamoDB
- **Tools:** Jira, TestRail, Postman, Git, Docker, Allure Reporting
- **Agile Methodology:** Agile (Scrum), BDD, TDD, Shift-Left Testing

TESTING EXPERTISE

Functional Testing
Regression Testing
Integration Testing
System Testing
API Testing
Accessibility Testing
E2E Testing
Exploratory Testing

PROFESSIONAL EXPERIENCE

Automation QA | Prodware Solutions | Remote | Feb 2025 - Feb 2026

- Architect and maintain automated test solutions using Playwright and WebdriverIO with TypeScript for large-scale React.js applications, ensuring reliable UI and API validation across multiple systems.
- Implement AI-driven Playwright MCP agents to intelligently generate test scenarios and expand coverage, significantly reducing manual test design and long-term maintenance costs.
- Design and execute comprehensive API validation using Swagger and Postman, ensuring contract integrity and seamless system integrations.
- Validate complex data flows between APIs and databases (Azure SQL, DynamoDB), improving backend reliability and defect detection.
- Partner closely with developers and product owners in a Scrum Agile environment, influencing test strategy, sprint planning, and release readiness.
- Embed automation into GitHub Actions CI/CD pipelines, enabling continuous quality feedback, scalable execution, and AI-assisted optimization of test reliability.

Automation Tester | FedTec | Remote | Feb 2024 - Feb 2025

- Develop and maintain a robust test automation framework that covers UI automation and Section 508 accessibility compliance for React.js based web applications.
- Collaborate with team members to generate comprehensive test cases based on project requirements.
- Perform both manual and automated test executions to ensure comprehensive test coverage and quality.
- Successfully integrated the test automation framework into a CI/CD pipeline using GitHub Actions, automating test execution and reporting.
- Generate and present multiple detailed QA reports to stakeholders to ensure transparency and actionable insights.

Tech Lead QA Automation Engineer | Maswer | Remote | Sep 2023 - Apr 2024

- Spearheading the modernization and enhancement of a legacy automation framework, leveraging Ruby, Selenium, and Cucumber to increase efficiency and maintainability.
- Owned the strategic transition from a legacy Ruby/Selenium/Cucumber framework to a modern TypeScript + Playwright architecture aligned with long-term scalability and maintainability goals.
- Designing and developing automated test scripts for a diverse range of new test cases, contributing to the high-quality release of software products.

Lead QA Automation Engineer | Infectious Disease Connect | Dallas, TX | Jan 2022 - Mar 2023

- Built and deployed Playwright + NodeJS automation suite with Allure reporting, enhancing API and Web Services testing.
- Integrated automation into CI/CD with Azure Pipelines and collaborated in Agile teams on feature validation.

QA Automation Engineer/SDET | CBQA Solutions | Leon, Mexico | Jul 2018 - Dec 2021

- Developed frameworks using Selenium/Java, Playwright/TypeScript, and Puppeteer/JS, automating 800+ UI and API tests.
- Wrote unit tests for AWS Lambda functions with DynamoDB, and led/mentored a team of 3 QA engineers.

EDUCATION

Bachelor's Degree in Computer Systems Engineering | EPCA University, Leon, Mexico | Aug 2017

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **MuleSoft Certified Developer, Level 1 - February 2020 to February 2022**

<https://training.mulesoft.com/award/certification/c3f3972f-c8fd-354e-be89-047644f55097/preview>

- **Understanding Typescript – Udemy, Completed April 2021**
 - Mastered TypeScript essentials, enhancing JavaScript with types for improved code quality.
 - Acquired advanced skills like using decorators, integrating third-party JavaScript libraries, and configuring the TypeScript compiler.
 - Practiced ES6 features, classes, interfaces, generics, and module management within TypeScript-focused workflows.
- **Complete Machine Learning & Data Science Bootcamp 2023 – Udemy, Completed August 2023**
 - Achieved mastery in Data Science and Machine Learning, trained by industry experts with experience in Silicon Valley and Toronto.
 - Hands-on learning from zero to mastery using the latest versions of Python, TensorFlow 2.0, and modern libraries.
 - Developed expertise in data exploration, neural networks, deep learning, and model evaluation.
 - Acquired proficiency in Python 3, Numpy, Scikit-Learn, and data visualization with Matplotlib and Seaborn.
 - Completed comprehensive training in data pre-processing, cleaning, and large data analysis for actionable insights in business applications.
 - Applied machine learning fundamentals to better understand and leverage AI-assisted testing strategies, intelligent test generation, and data-driven automation improvements.
